

BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING

Figure IA

The information printed on the body of the bullet's casing represents:

1. B.F.F.R U.S.A represents the presumed U.S.A Federal Agency incharge of maintaining a database for all the ammo in the country. That the bullet's casing is the property of the Agency.
2. That J.Max & Co. U.S.A is the maker of the ammunition.
3. That "Gun" represents the type of firearms for the ammo.
4. That the number represents the serial number of the ammo.
5. The bullet is printed with the exact information printed on its casing, linking the bullet to its casing.

Figure IB

The bullet is fitted into its casing, with its same serial number that is printed on its casing hidden in the casing.

Figure IC.

The bullet showing its identification serial number and other information printed around its top section- that part that goes into the casing.

Figure ID.

The ammunition package with a transparent cover, showing the five serially numbered bullets with their information for the ammo purchaser to see.
